the amendments would certainly carry by

voles cast. "It is a good business investment to own gur water works. It is something that we have been fight, secured the
right to purchase the aster works, and
now the question is to pay for them. Every
city of importance must have parks and
boolevards. Kansas tity is destined to be
the greatest city west of the Missouri. The
time has come to acquire these parks, and
I believe that the volors of Kansas city

for the amendments on fact Tuesday."

J. H. Thomson, clerk of the criminal court: "I am heartily in favor of the amendments every one, and will vote for them next Thursday. There has always been a tendency to keep back public improvements in Kansas City, and I am glad that the movement has at last been started in the other direction. I am in favor of public parks, as it gives the citizens a place to go and rest his weary bones after the fatigue of the day. The lefa of the city owning the water works is a first-class one, and will be doubt meet with a bearty approval from all the voters when the time comes."

Prof. Munyon should receive the blessings of every man and woman in Kaning people, said a well known citizen yesterday. By so doing and permitting the press to publish results in each he at once showed to the public that they could obtain relief from their ills with-

His honest method of doing business proved in less than two weeks that his cures were exactly as represented. The sick and afflicted could purchase these cures with confidence, having seen the effect of their wonderful curative powers on some follow sufferer. Unlike others, Prof. Munyon has put a price on his medicines which brings them within the reach of all, so that any invalid in Kansas City to-day can be cured at a cost not exceeding one visit from a physician. Fathers and mothers with his "Guide to Health" and two or three dollars' worth of Munyon's cures in the house feel insured against disease.

Hundreds of men and women in our city are at work to-day earning bread for their little ones who two weeks ago, owing to some serious allment, could not obtain employment. Why should these people not speak in the highest praise of Munyon and every good citizen in Kansas City join them in lauding this new school of medicine which has brought such happiness to their homes?

A most convincing proof of the value of Munyon's cures is this: Several druggists report to his representatives that they have been informed by some doctors that if they continue to sell these remedies the physicians would send them no more prescriptions. We wish to say to the pharmacists of Kansas City; Do not mind these threats. The most intelligent physicians who desire to cure their patients instead of fattening the pocket-book, will indorse and thankfully receive any prescription which relieves suffering humanity, and the public will soon discover who the others are and place them where they belong Munyon's Rem-Without License.
